Warranty

A. This LIMITED WARRANTY provides assurance for the customer who purchases an Integra Product (hereinafter the "Product") that should the Product fail to function to Integra's published specifications during the term of this LIMITED WARRANTY (one year from the date of shipment for new Product), that Integra will at its option either replace, repair, or issue a credit (adjusted to reflect the age of the Product) for the Product or any portion thereof. This LIMITED WARRANTY is extended only to the buyer purchasing the Product directly from Integra or from its affiliate or its authorized distributor or representative.

B. To qualify for this LIMITED WARRANTY, the following conditions must be met:

(1) The Product must be used on or before its "Use By" or "Use Before" date, if applicable.

(2) The Product must be used in accordance with its labeling and may not be altered or subjected to misuse, abuse, accident or improper handling.

(3) Integra must be notified in writing within thirty (30) days following discovery of a defect.

(4) The Product must be returned to Integra within thirty (30) days of Integra receiving notice as provided for in (3) above.

(5) Upon examination of the Product by Integra, Integra shall have determined that: (i) the Product was not repaired or altered by anyone other than Integra or its authorized representative, (ii) the Product was not operated under conditions other than normal use, and (iii) the prescribed periodic maintenance and services have been performed on the Product.

C. This LIMITED WARRANTY is limited to its express terms. THIS LIMITED WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED WHETHER STATUTORY OR OTHERWISE, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. In no event shall Integra be liable for any consequential, incidental, prospective or other similar damage resulting from a defect, failure, or malfunction of the Product, whether a claim for such damage is based upon the warranty, contract, negligence or otherwise.

D. The exclusions and limitations set out above are not intended to, and should not be construed so as to, contravene mandatory provisions of applicable law. Users may benefit from statutory warranty rights under legislation governing the sale of consumer goods. If any part or term of this LIMITED WARRANTY is held by any court of competent jurisdiction to be illegal, unenforceable, or in conflict with applicable law, the validity of the remaining portion of the LIMITED WARRANTY shall not be affected, and all rights and obligations shall be construed and enforced as if this LIMITED WARRANTY did not contain the particular part or term held to be invalid.

Ordering Procedure

A written purchase order on customer's form may be requested for purchase of Integra products.

Acceptance of Order

Orders are accepted upon approval by Integra.

Returned Goods Policy

Products must be returned in unopened packages with manufacturer's seals intact to be accepted for replacement or credit unless returned due to a complaint of product defect. Determination of a product defect will be made by Integra. Products will not be accepted for replacement if they have been in the possession of the customer for more than 90 days.

Repairs and Maintenance

Should your instruments require repair or maintenance, contact Integra for return authorization and address. Instruments returned to Integra for repair must have a statement testifying that each instrument has been thoroughly cleaned and sterilized. Failure to supply evidence of cleaning and disinfection will result in a cleaning charge and delayed processing of your instrument repair.

Product Information Disclosure

Integra and its subsidiaries ("Integra") and manufacturer exclude all warranties, except Integra's applicable standard warranty whether expressed or implied, including but not limited to, any implied warranties of merchantability or fitness for a particular purpose. Neither Integra nor manufacturer shall be liable for any incidental or consequential loss, damage, or expense, directly or indirectly arising from use of these products. Neither Integra nor manufacturer assume nor authorize any person to assume for them any other or additional liability or responsibility in connection with these products.

Head and Neck Instrumentation

Henry Endoscopic Parathyroid Instrument Set

The Henry instruments were designed for the minimally invasive endoscopic lateral approach to parathyroid surgery.

The set includes a series of insulated monopolar instruments to provide hemostasis to the operative site. The 3mm trocars provide operating ports for the instrumentation and can be sutured to prevent involuntary removal. The 10mm trocar ring has been specifically designed to maintain insufflation and traction during surgery.

Developed in conjunction with Jean-François Henry, MD

Catalog #	Description
MCLP00**	Henry Endoscopic Parathyroid Instrument Set

Set consist of the following;

Catalog #	Description
MCLP10	Blunt Trocar, 3.0mm, 72mm (2⅞")
MCLP20	Monopolar Grasping Forceps, 2.8 x 10.0mm, 182mm (7¼")
MCLP25	Monopolar Grasping Forceps, Axial, 2.8 x 10.0mm, 100mm (3⅞")
MCLP30	Monopolar Alligator Forceps, Axial, 1.0 x 6.0mm, 98mm (3⅞")
MCLP40	Monopolar Scissors, Axial, 3.0mm Blades, 92mm (3⅝")
MCLP50	Monopolar Coagulating Hook, 106mm (4⅛")
MCLP60	Blunt Probe, 180mm (7")
MCLP70	Trocar Ring, 13.4mm Inside Diameter
CP391	Monopolar Cable, 72.8" to 6'-8"
3717012	Medium Instrument Tray, 38cm L x 25.5cm W x 7.4cm D (15" L x 10" W x 2⅞" D)

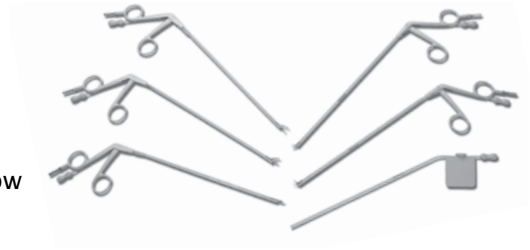
Laryngeal Instrumentation

Abitbol Laser Microlaryngeal Instruments

These refined instruments help reduce many of the complications associated with laser surgery of the larynx. The set of grasping forceps is insulated and may help minimize the possibility of laser-related injuries. The forceps has integrated suction for evacuation of the laser plume, and features monopolar jaws to allow hemostasis in the areas of the larynx that are difficult to address.

Developed in conjunction with Jean Abitbol, MD



Catalog #	Description
MCL205	Monopolar Grasping Forceps W/ Suction, 3.0 x 8.0mm, Fenestrated Jaws, 200mm (7¾")

Sataloff Laryngoscopes

The Sataloff Laryngoscopes have a large proximal opening for binocular microscope vision. They offer dual light fibers and dual suction for maximum illumination and visualization during microsurgery. The elevated triangular tips have been blunted that may help reduce tissue trauma.

The anterior commissure laryngoscopes (MCL120, MCL121, MCL122, and MCL123) have been designed to help provide the ability to examine the vocal cords at the anterior commissure. In addition, the MCL125 anterior commissure laryngoscope was designed for patients with limited laryngeal exposure.

The Vallecula Laryngoscope (MCL124) has a wide proximal opening and a high blunted lift on the distal tip.

All laryngoscopes can be used with the MicroFrance suspension apparatus (MCL76) and chest plate (MCL35).

Catalog #	Description

3717023

Sataloff Indirect Laryngeal Instrument Set

The Sataloff Indirect Laryngeal Instrument Set is used for office-based procedures. This set includes dilators, cupped forceps, scissors, heart-shaped forceps, alligator forceps, and suctions that are curved to help facilitate access to the laryngeal region with the patient in a sitting position. The smaller instrument tray has been designed for use with office-oriented sterilization equipment.

Developed in conjunction with Robert T. Sataloff, MD, DMA, FACS

Catalog #	Description
MCLS62**	Sataloff Indirect Laryngeal Instrument Set

Set consist of the following;

Catalog #	Description
1650030	Oro-Tracheal Injector with Curved Cannula, 222mm (8¾")
MCLS44	Sataloff Laryngeal Dilator, Size 0, 9.5mm, 205mm (8")
MCLS45	Sataloff Laryngeal Dilator, Size 1, 11.3mm, 205mm (8")
MCLS46	Sataloff Laryngeal Dilator, Size 2, 14.1mm, 205mm (8")
MCLS47	Sataloff Laryngeal Dilator, Size 3, 16.3mm, 205mm (8")
MCLS48	Modular Handle, 200mm (7¾")
MCLS49	Indirect Cup Forceps, 2.4mm, Straight, 175mm (7")
MCLS50	Indirect Cup Forceps, 2.4mm, Left, 175mm (7")
MCLS51	Indirect Cup Forceps, 2.3mm, Curved Right, 185mm (7¼")

7844T3L25

Laryngeal Bipolar Forceps

The Laryngeal Bipolar Forceps are designed for laryngology and phonomicrosurgery procedures.

The coagulating tip is 5mm in length, and the design helps ensure that the bipolar energy is delivered in a controlled manner. The 29cm length and the 3mm outer diameter make these forceps useful for delicate work. A specially designed stainless steel instrument tray is also included.

Catalog #	Description

Kraus TM MicroCut® Forceps

The Kraus TM MicroCut® Forceps were designed to help remove the epithelial edge of a tympanic membrane perforation without over-enlarging the existing perforation.

Useful during tympanic membrane patching, myringoplasty, and tympanoplasty procedures

Designed for precision edge cutting

Low profile rotation knob allows for universal 360° cutting ability and promotes visualization

Thumb-activated reverse-action handle allows for controlled movement and helps reduce distal tip motion

Distal tip basket captures resected tissue to help prevent tissue from entering the middle ear

Developed in conjunction with Eric M. Kraus, MD, MS, FACS

Catalog #	Description
MCO270	Kraus TM MicroCut® Forceps, 90° Up-Biting
MCO271	Kraus TM MicroCut® Forceps, Forward-Biting
MCO272	Kraus TM MicroCut® Forceps, Backward-Biting

Selesnick Lateral Skull Base Set

The MicroFrance® Selesnick Lateral Skull Base Set comprises 24 different instruments designed for dissection in skull base surgery.

The instruments have slim profiles to promote access, feature a working length of 190mm, and offer a range of working tips to facilitate control and precision in difficult-to-reach areas.

Developed in conjunction with Samuel H. Selesnick, MD, FACS

Catalog #	Description

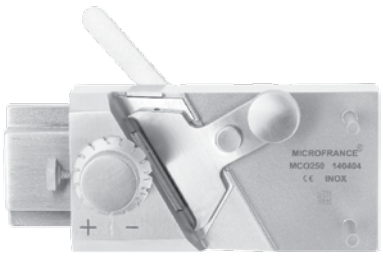
Martin Cartilage Cutting Block

Catalog #	Description
MCO250	28.0mm Cutting Width



Teixido Cartilage Cutter

The Teixido Cartilage Cutter provides a simple solution to preparing cartilage grafts for tympanoplasty and ossicular chain reconstruction procedures. This device slices cartilage in a standard thickness of 0.3mm in one swift motion. Working space for trimming and measuring the cartilage is also incorporated to facilitate graft preparation.

Minimum number of parts to clean

Angled, replaceable blade

0.3mm cartilage slice allows for 2-3 slices per tragus

Developed in conjunction with Michael Teixido, MD

MCO255

Plastic Surgery Instrumentation

Toriumi Rhinoplasty Instrument Set

The guard and tip of the Toriumi Osteotome is specially shaped to glide along the lateral surface of the bone during lateral osteotomy.

The Toriumi Curved Rasp's small cutting surface helps with targeted reduction of the dorsal hump and radix. The suction elevators help provide visibility during septoplasty.

Developed in conjunction with Dean M. Toriumi, MD

Catalog #	Description
3717008**	Toriumi Rhinoplasty Instrument Set

Set consist of the following;

Catalog #	Description
CP1100	Curved Rasp, 100mm (3⅞")
CP1102	Suction Elevator, Sharp, 82mm (3¼")
CP1103	Suction Elevator, Blunt, 82mm (3¼")
CP1109	Cartilage Template, Black Delrin, 80 x 90mm 1 x 1cm Gridlines, Templates, 6.87, 7.65 and 10.3mm
CP604BR	Adson Bipolar Forceps, 120mm (4¾")

Becker Rhinoplasty Instruments

The converse scissors are specially shaped and can be used for sharp incisions and blunt dissection in a number of rhinoplasty applications. The 2.5mm and 3.0mm single-guarded osteotomes have been designed to perform lateral osteotomy. The diamond-coated jaws of the diamond-jaw needle holder allow a secure grip on needles and suture.

Developed in conjunction with Daniel G. Becker, MD

Catalog #	Description

Sinus Instrumentation

Duncavage Sphenoid Sinus Instrument Set

The Duncavage Sphenoid Sinus Set was developed to allow access to the interior of the sphenoid sinus. These instruments help surgeons remove cysts and bone, as well as strip mucosa and palpate masses within the sphenoid sinus. All of the Duncavage instruments feature a 25° bend superiorly and a 25° bend inferiorly at the distal tips that allow the surgeon to help access the sphenoid sinus. They also feature reverse-action handles that help reduce the amount of movement at the distal tips when actuated.

Developed in conjunction with James A. Duncavage, MD

Levine Orbital Decompression Instrument Set

The Levine Orbital Decompression Instrument Set is suited for intranasal endoscopic orbital decompression. The Levine Perforator is designed to create the initial opening through the medial orbital wall (lamina papyracea). The 15 degree angled suction curettes and picks are designed to help gently remove the lamina. The angled sickle knife incises the periorbita to liberate the orbital fat. The serrated jaws of the angled forceps do not completely close, allowing for a firm, yet atraumatic grip to assist in teasing the orbital fat into the sinus cavity. The 10-instrument set is provided with an instrument tray.

Developed in conjunction with Howard L. Levine, MD

Wormald Frontal Sinus Surgery Instrument Set

This malleable set of instruments has been designed to aid in preservation of mucosa within the frontal recess and frontal sinus. The set includes five instruments and an instrument tray. Each instrument has a working length of 11cm with an outer diameter ranging from 2.0mm to 2.5mm. The last 4cm of each instrument is malleable for access across a wide range of anatomies. A variable suction design on the malleable suction probe, freer suction elevator, and sharp-cupped suction curette allows the surgeon to control the amount of suction through a thumb-controlled aperture.

Backbiting Forceps

Available in four sizes, the MicroFrance® Backbiting Forceps provide an outstanding cutting edge, thin shaft, and strong cutting capability while working in the nasal cavity. Trying to use a shaver on the uncinate process can be difficult, so these specialized backbiters allow a reverse approach when removing or making an opening in the uncinate process during sinus surgery.

They also provide a better alternative to traditional backbiting forceps because of their unique downward sloping shaft. The slim profile and tapered shaft design of these forceps fit ideally into the middle meatus to aid in reducing trauma to the middle turbinates during surgery. MCEN27-3 features a distinctive gentle upward curved shaft for accessing difficult-to-reach areas of the sinus.

Mini-Struycken Through-Cutting Forceps

These through-cutting forceps with a slim profile assist in accessing the frontal recess and frontal sinus to help remove cell walls and bony partitions. The forceps are designed in both side-to-side and front-to-back biting configurations with 90 and 45 degree bends. They are also designed with rectangular jaws in the dimensions of 3.0mm wide with a 1.5mm wide bite.

Wormald Bipolar Forceps with Suction

Available in two lengths, the Wormald Bipolar Forceps with Suction help achieve hemostasis during endoscopic sinus and anterior skull base surgery. The longer forceps are able to reach the pituitary. Both feature a slim profile and fine tips to help provide access within difficult-to-reach areas. The integrated suction can be advanced independently of the cautery tips to help provide visibility of the operative site, and then retracted from the line of sight during cauterization. An integrated flush port facilitates cleaning and debris removal.

Developed in conjunction with P. J. Wormald, MD, FRACS, FRCS

Rouvier Sinus Trocar and Sleeve

Catalog #	Description
MCEN25-4-0	Cannula, 106mm, (4⅛") Trocar, 194mm, (7¾')

Sinus Probe

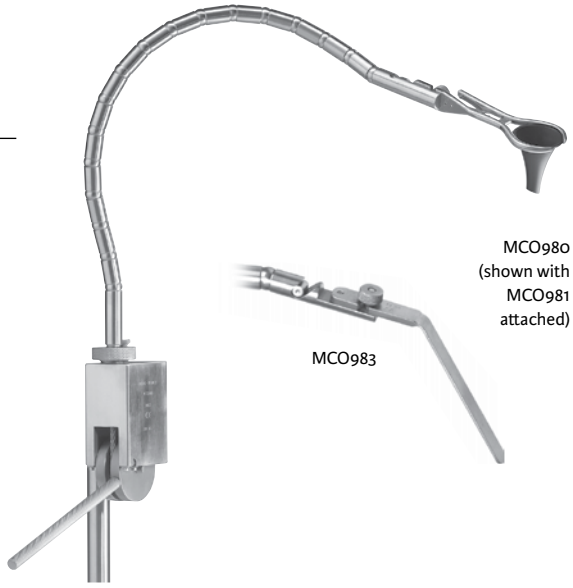
Catalog #	Description
7731	1.4mm, Angled Handle, 106mm (4⅛")

Legent Flexible Tension Arm

The MicroFrance® Legent Flexible Tension Arm can be used for a variety of procedures including otology, neurotology, and sinus procedures. The flexible arm attaches to the operating room table and holds a variety of instrumentation so that both hands can be free for operation. Included with the flexible arm are the ear speculum forceps, malleable retractor blade, and nasal speculum connection. An adjustable endoscope holder is also available to support a rigid telescope. The angulated ball joint can be used with any of the attachments to facilitate positioning of the instrument during surgery.

Legent Flexible Tension Arm

Catalog #	Description
MCO980	Flexible Tension Arm 450mm (17¾")
MCO981	Ear Speculum Forceps
MCO982	Nasal Speculum Connection
MCO983	Malleable Blade Retractor, 12.0 x 86.0mm



MCO980 (shown with MCO981 attached)
